

The 380 Portable Shot/Indoor Weight Circle Platform consists of a 8'x8'x1.5" wooden platform and a 12mm track surface underneath for traction. The wooden platform is made up of (2) two layers of 3/4" plywood.

The wooden platform breaks down to (2) two sections of 4'x8' for easy transport and storage. This indoor weight/shot put ring meets regulation requirements (2.135m dia).

The inner ring is painted with a base coat of water-based grey paint and finished with an anti-slip clear coat.

NOTICE

Never move the platform while both sections are connected. Always un-latch and separate before moving.
