F3047 SOLID PLUG FOR TRACK SURFACE SPECIFICATION

The F3047 Solid Plug for the F304 Access Panel serves as a base to pour or roll out track surface onto. This is great for fields where the football goal is mounted in the D-zone of a track. The base is made of .125" folded aluminum with a notched corner for easy removal. The base comes in two pieces and the customer is responsible for attaching the track surface.
