885 - ELITE TENNIS POSTS ASSEMBLY INSTRUCTIONS

CAUTION - contact your local utility companies to locate buried electrical, gas, and water lines before digging holes for footings.

Locate and dig footings for each ground sleeve. The footer size is to be determined by the architect/engineer and is based on local codes and soil conditions. Confirm all locations and dimensions before setting. Sleeve depth will depend on court surface thickness. Add a gravel base as needed for proper drainage.

Fill with concrete, sloping the top for proper drainage. Allow concrete to set a MINIMUM of 24 hours before proceeding.
