# 504 - STAINLESS STEEL VAULT BOX SPECIFICATIONS

## SPECIFICATIONS

The 504 Stainless Steel Vault Box is fabricated from a corrosion resistant stainless steel alloy. The sides and bottom of the box are cut out and folded from a single sheet. The box backstop is welded to the sides and bottom with a continuous weld along the outside edge. The upper edges along the front, sides, and back are folded over to eliminate any sharp edges. Bolts installed at all four corners at slotted holes to secure the box position when placed in concrete.
