## 7401452XX - MESH BARRIER SEAL INSTRUCTIONS

Tools needed:  
Two people  
One 9/16" wrench  
PVC Glue  
Sand

Approach Side View

The light weight barrier seal moves up and down with the barrier to prevent glare at all heights.

Mesh barrier seal reduces glare and is available in five colors

The top of the barrier seal is supported by a 1-5/16" diameter pipe.

Top Support Pipe

The bottom of the barrier seal is weighed down with a PVC pipe filled with sand.

Bottom Weighted PVC Pipe

| Color            | Part Number |
|------------------|-------------|
| Royal Blue       | 740145202   |
| Red              | 740145203   |
| White            | 740145204   |
| Gray             | 740145209   |
| Black            | 740145212   |
| White w/ Graphic | 740145204SP |

Black Vinyl Pipe Cap  
(PCAP00056002)

Top Support Pipe  
(7401453)

1. Put the black vinyl end caps onto the the ends of the top support pipe.

2. Slide the top support pipe through the top pocket (with cut outs) of the barrier seal.

3. Remove the bolt from the under side of the barrier on the water pit side. Use the pipe hangers and existing hardware to hang the top support pipe.

Pipe Hanger  
(CLMP00088)

3. Glue one end cap onto the PVC pipe. Glue is not provided. Fill the PVC pipe with sand and glue the other cap on.

4. Slide the assembled pvc pipe into the bottom pocket of the barrier seal and let it drape into the water pit.
