HAMMER CAGES

SAFETY.
CONVENIENCE.
LONGEVITY.

Gill hammer cages have exclusive features that protect athletes, officials, and spectators from errant throws in the hammer event. Combined with an industry best five-year warranty, Gill Athletics keeps your facility at the top of its class in safety and efficiency. Your facility deserves the best.

SAFETY PULLEY SYSTEM

Block and tackle pulley system lowers the net to safely remove 'stuck' implements from the nets without climbing.

FRONT DOOR CABLE DESIGN

With Gill's exclusive tensioning cable front door design your cage will increase athlete safety and efficiency in the event. No more bent front pole from errant throws, and decrease the likelihood of bounce backs from implements.

DOOR HINGE LOCK BOLT

Suggested from the top track designer in America, this unique feature keeps your front doors from tweaking and misaligning from the door hatch location.

REAR DOOR ACCESS

Netting System that keeps your athletes away from the throwing sector of the front cage while increasing the speed of repetitions.

VERSACOM BOXES

CONNECTING IT ALL TOGETHER

The *VersaCom Box* provides a junction for electricity and cable hookups. This box can be put in virtually any location around performance areas of varying surfaces. The open bottom of the VersaCom Box provides adequate drainage and conduit entry, while the hand holes in the cover allow easy access.

- Divider plates in full size version, provided to help keep electrical equipment segregated
- Main box structure is made of 1/4" thick folded aluminum
- Lid is constructed of 1/4" aluminum plates for maximum support and durability

The *VersaCom Box - Synthetic Version* allows material to be bonded or poured onto the top of the lid to match the surrounding surface.

The *VersaCom Box - Turf Version* features a supplied aluminum top to allow artificial turf to be glued on the jobsite, and is tethered to the box. This top is reinforced with multiple aluminum plates for maximum strength and durability. Factory installed turf infill retainment brushes keep infill out of the box.

VERSACOM RISER *(Sold separately)*

The VersaCom Riser has the same dimensions as a full-size VersaCom Box. The riser attaches to the bottom creating a box that is twice as deep.

SAND PIT FORMS & COVERS

Sand pit forms hold more than just sand, they hold value.

With four different options of Sand Catcher locations and two practical Sand Catcher Cover options, you can design the horizontal jump facility that will perfectly meet your needs.

No matter which combination you choose; with the Gill Functional-Form, you can rest assured it's the finest product (with the easiest installation) available.

Choose from one of two Sand Catcher Cover systems: traditional grate and mat or Gill (exclusive) Recessed Lid. When you consider the main function of a Sand Catcher system is not to catch sand but to store it, the Recessed Lid system is rapidly becoming the choice of facilities worldwide, as it is designed to receive track surfacing to match your track facility. When coupled with the 730148 Aluminum Sand Pit Cover, a complete logical design emerges for your world class jumps facility.

Choose from one of four sand catcher locations: no sides, two sides, two sides and back, or all four sides. Choosing Sand Catchers on the sides will cut unnecessary costs and eliminate potential trip hazards, providing more than ample storage space for overflow sand.

RAISED RUNWAYS

In the past, these types of runway systems have been priced upwards to \$75k! You can now have this product at a fraction of that price. The Gill Raised Runway allows for the flexibility to design runways that will accommodate the pole vault, long jump and triple jump for all levels of competition and practice.

The basic unit is an 8' x 4' general runway section. Specialized sections incorporate a vault box or take-off board trays and blanking lids. The construction of each section is welded aluminum, with 1/2" plywood decking. Track surfacing is not included, so you can have your preference on surfacing.

Adjunct products for the Raised Runway include the Soft Shell Sand Pit Form for the long and triple jump (sand not included), and a pole vault pit elevating system.

ACCESS FRAME KIT

This kit provides effortless access to the base of a football goal for easy installation, adjustment, or removal. The access frame creates a uniform, seamless surface around the goal post for improved safety. Kit includes access frame and pole plugs that fit around a goal post with a diameter up to 6". For safety, a solid plug is strongly recommended for use when the goal post is removed. Each goal post requires one kit. Blank metal allows track surface application for continuity in D-Zones.
