LANDING SYSTEMS

LANDING SYSTEMS

For over 100 years, Gill Athletics has been the leader of innovation in the sport of track & field. Our pole vault and high jump landing systems are engineered by collegiate athletes, professionals, and coaches. We are honored that the NCAA® and NFHS® have both partnered with us as we work together to elevate each athlete's journey and deliver a first-class experience.

DOUBLE FRONT SYSTEMS

Available on G4, G6, and AGX M4. Call for Details.

SIDE CARABINER CONNECTION:

Top Pad is connected to base pads with carabiner side attachments, eliminating any obstruction on top of the pit. This exclusive attention to detail provides an obstruction-free landing area with athletes' safety in mind.

OPTIMAL PIT ENTRY ANGLE:

An ASTM approved vault box collar changes the slope of the tri-slant area when vaulting poles rotate. Gill's thoughtful pit entry design accounts for the box collar's effect by featuring a vaulter friendly angle.

GILL LANDING SYSTEMS FEATURES*

Top Pads

EDGE-TO-EDGE TOP PAD: Aesthetic and functional design eliminates spike contact with base units and unevenness at the edge of the pit. This Gill exclusive feature will increase the life of your new pit and improve safety near the edges.

TUFMESH PLUS™ CASING: Using exclusive 17 x 11 1000 denier material increases the life of your top pad and stands up to repeated use better than any other landing system.

2" DURALIFE™ FOAM: Soft and durable foam creates confidence in every practice. Coaches can teach with assurance because of this industry leading design.

V-LOOP VINYL STRAP: Designed to evenly distribute the force from the athlete's landing, V-Loop straps eliminate tears compared to traditionally designed pits that put undue stress on the seams.

REVERSIBLE: Extend the life of your pit, Gill's top pads are designed to use either side safely and easily.

Vinyl Base Units

ALL-VINYL BASE: Exclusive to Gill landing systems, this unique design keeps water out of your pit better than traditional mesh top units. To extend the life of your pit you keep water out of the foam. Gill's all-vinyl design gets results.

COMPLETE INTERCHANGEABILITY: Reversible sections for maximum interchangeability. This adds years to the life of your pit by maximizing the usage and size of the athlete's landing area.

QUADRUPLE DURALIFE LAYER FOAM: Athletes need to know they are landing safely and comfortably. Gill's new QUADRUPLE Duralife foam is 25% softer than others yet with firmness necessary for the safest landings.

DUAL COATED VINYL: Evenly distributed 1000 x 1000 denier polyester fabric is bonded on both sides with 18oz knife-coated PVC vinyl. This exclusive fabric design eliminates vinyl delamination seen in other pits after years of use. This creates the most durable casing that is lighter than the other pits.

STITCHING: Gill's entire landing system is stitched with the industry's strongest 210 bonded polyester thread. Simply put, your new Gill pit comes triple stitched with the toughest thread in the industry to hold up to high volume practices.

GRIP STRIP FASTENING SYSTEM: A pit is safest when constructed as an integrated system. Gill's Grip Strip Fastening System will keep your base sections functioning as one unit season after season.

ECO-SMART COMPRESS PACKS: Gill Athletics cares about the environment and your budget. All landing systems are expertly packed and shipped utilizing Compress-Pack shipping, reducing freight volume lowering fuel consumption and shipping costs. Pits restore to original size and shape minutes after unpacking.

12 YEAR WARRANTY: A long-term warranty is only as dependable as the company standing behind it. And after 100 years, you can count on Gill to stand behind your landing system for years to come. If any failure occurs in the first 12 years, under normal use and care, we will repair or replace the damaged part. Essentials line includes 5 year warranty.

CUSTOM COLOR AND GRAPHICS: Choose from over 100 unique vinyl casing and top pad color combinations offered at NO EXTRA CHARGE! Select your vinyl casing (xx) and top pad (yy) color combination. Add distinction with multi-color graphics on the top pad, weather cover, or both.

RAISED RUNWAYS

In the past, these types of runway systems have been priced upwards to \$75k! You can now have this product at a fraction of that price. The Gill Raised Runway allows for the flexibility to design runways that will accommodate the pole vault, long jump and triple jump for all levels of competition and practice.

The basic unit is an 8' x 4' general runway section. Specialized sections incorporate a vault box or take-off board trays and blanking lids. The construction of each section is welded aluminum, with 1/2" plywood decking. Track surfacing is not included, so you can have your preference on surfacing.

Adjunct products for the Raised Runway include the Soft Shell Sand Pit Form for the long and triple jump (sand not included), and a pole vault pit elevating system.

JAVELINS

The choice of elite throwers worldwide! OTE javelins are handmade in the USA by the master artisans who are following in the tradition of the world's greatest name in javelin development: Dick Held. The performance potential of OTE javelins is unsurpassed, being used for numerous championship wins and world records.

Gill Athletics is proud to be the exclusive North American distributor of all Nordic javelins. The Nordic Sport javelins are all manufactured with the famous Nordic finish and Nordic quality. Gill manufactures the elite OTE javelins, as well as the championship level Pacer javelins. Both Gill and Nordic provide different level javelins as well as rubber tipped javelins.

Built by the same master craftsmen that make the OTE javelins, Pacer javelins are built to slightly more generous tolerances. These javelins are built for performance and durability, and are suitable for high level competition. Pacer is the brand of choice for coaches seeking great value.

This lower price point line of javelins is recommended for high school level competition offering unsurpassed value. The best quality javelin for a budget-conscious program, Tru-Flight javelins allow athletes to have more efficient practice sessions by purchasing multiple javelins at nearly the same price as a singular higher-priced javelin!

CHOOSING A JAVELIN

STEP 1 Decide if you are purchasing a Rubber Tipped, 600g women's, or 800g men's javelin.

STEP 2 Consider the technical proficiency of the athlete. Javelin throwers who are skilled at flying the javelin will get farther throws when they throw through the point using OTE javelins. Throwers who occasionally miss accurate flights should switch between OTE and Pacer to help learn the fine points of flying the javelin. Beginners will learn quicker with Tru-Flight javelins, and if possible, should occasionally try an OTE to see if they understand how to really make it fly.

STEP 3 Once you have decided which javelin will best maximize your athlete's potential, choose a light, medium, or max relative flex javelin. Generally speaking; the stiffer the javelin, the longer the throw, assuming it is thrown precisely through the point.

CARBON 1™

Gill Athletics is privileged to announce our exclusive partnership with Countervail® to create the world's most technologically advanced javelin. The OTE Carbon 1 Countervail provides up to a 40% quicker damping rate which results in longer flights with minimal vibration.

The Carbon 1 Countervail is designed after the world-record setting OTE Legend tailwind javelin, and rooted in a patented design by the inventor of modern javelins, Dick Held. Featuring a flex of 4.4 and thicker grip cord for more support and control, this javelin will behave similar to old-rules javelins and appear to "float" when thrown clean.

HEADWIND (H) A headwind version of an OTE javelin describes a streamlined tip designed to help cut through the wind. This javelin tip, because of its small surface area, will have self-correcting characteristics when a thrower misses the point, adding valuable distance to a missed throw. The headwind version is ideal for 'power' throwers who lack perfect technique but make up for it with strength and torque.

TAILWIND (T) A tailwind version of an OTE javelin describes a thicker, more blunted tip that increases the surface area in front of the javelin. When a thrower hits the point with a tailwind version of an OTE javelin, it will mimic the old rules style javelins, with a beautiful floating flight and greater distances. This tailwind version is ideal for 'finesse' throwers who lack high outputs of power, yet throw at a high technical level.

HEMP CLIMBING ROPES

This 1-½" rope contains 12-18% mineral oil lubricant by weight for long life and is securely attached within a heavy-duty steel fitting for years of durability. Optional rubber knots anchored every 12". Collegiate ropes are finished with a vinyl boot.

SOFT DACRON ROPES

Soft Dacron ropes are ideal for elementary physical education programs. The no-twist spun Dacron material is easier on hands than hemp ropes and will wear better than cotton. Hypoallergenic.

SAND PIT FORMS & COVERS

Sand pit forms hold more than just sand, they hold value. With four different options of Sand Catcher locations and two practical Sand Catcher Cover options, you can design the horizontal jump facility that will perfectly meet your needs.

Choose from one of four sand catcher locations: no sides, two sides, two sides and back, or all four sides. Choosing Sand Catchers on the sides will cut unnecessary costs and eliminate potential trip hazards, providing more than ample storage space for overflow sand.

Choose from one of two Sand Catcher Cover systems: traditional grate and mat or Gill (exclusive) Recessed Lid. When you consider the main function of a Sand Catcher system is not to catch sand but to store it, the Recessed Lid system is rapidly becoming the choice of facilities worldwide, as it is designed to receive track surfacing to match your track facility. When coupled with the 730148 Aluminum Sand Pit Cover, a complete logical design emerges for your world class jumps facility.

No matter which combination you choose; with the Gill Functional-Form, you can rest assured that you have chosen the finest product (with the easiest installation) available.

CAGES

HAMMER CAGES

SAFETY.
CONVENIENCE.
LONGEVITY.

Gill hammer cages have exclusive features that protect athletes, officials, and spectators from errant throws in the hammer event. Combined with an industry best five-year warranty, Gill Athletics keeps your facility at the top of its class in safety and efficiency. Your facility deserves the best.

FRONT DOOR CABLE DESIGN

With Gill's exclusive tensioning cable front door design your cage will increase athlete safety and efficiency in the event. No more bent front pole from errant throws, and decrease the likelihood of bounce backs from implements.

DOOR HINGE LOCK BOLT

Suggested from the top track designer in America, this unique feature keeps your front doors from tweaking and misaligning from the door hatch location.

BLOCK & TACKLE PULLEYS

Block and tackle pulley system to safely remove 'stuck' implements from the nets without climbing.

REAR DOOR ACCESS

Netting System that keeps your athletes away from the throwing sector of the front cage while increasing the speed of repetitions.

VERSACOM BOXES

CONNECTING IT ALL TOGETHER

The *VersaCom Box* provides a junction for electricity and cable hookups. This box can be put in virtually any location around performance areas of varying surfaces. The open bottom of the *VersaCom Box* provides adequate drainage and conduit entry, while the hand holes in the cover allow easy access.

- Divider plates in full size version, provided to help keep electrical equipment segregated
- Main box structure is made of 1/4" thick folded aluminum
- Lid is constructed of 1/4" aluminum plates for maximum support and durability

The *VersaCom Box - Synthetic Version* allows material to be bonded or poured onto the top of the lid to match the surrounding surface.

The *VersaCom Box - Turf Version* features a supplied aluminum top to allow artificial turf to be glued on the jobsite, and is tethered to the box. This top is reinforced with multiple aluminum plates for maximum strength and durability. Factory installed turf infill retainment brushes keep infill out of the box.

SOLD SEPARATELY

VERSACOM RISER

The *VersaCom Riser* has the same dimensions as a full-size *VersaCom Box*. The riser attaches to the bottom creating a box that is twice as deep.
