# WHAT'S YOUR WHY?

Because coaching is your passion. Because coaching changes lives. Because your athletes need to land safely. That's why Gill athletic equipment is set apart. We understand you need the freedom to focus on your athletes.

## DOUBLE FRONT SYSTEMS

Available on G4, G6, and AGX M4. Call for Details.

### SIDE CARABINER CONNECTION:

Top Pad is connected to base pads with carabiner side attachments, eliminating any obstruction on top of the pit. This exclusive attention to detail provides an obstruction-free landing area with athletes' safety in mind.

### OPTIMAL PIT ENTRY ANGLE:

An ASTM approved vault box collar changes the slope of the tri-slant area when vaulting poles rotate. Gill's thoughtful pit entry design accounts for the box collar's effect by featuring a vaulter friendly angle.

## GILL LANDING SYSTEMS FEATURES\*

### Top Pads

**EDGE-TO-EDGE TOP PAD:** Aesthetic and functional design eliminates spike contact with base units and unevenness at the edge of the pit. This Gill exclusive feature will increase the life of your new pit and improve safety near the edges.

**TUFMESH PLUS™ CASING:** Using exclusive 17 x 11 1000 denier material increases the life of your top pad and stands up to repeated use better than any other landing system.

**2" DURALIFE™ FOAM:** Soft and durable foam creates confidence in every practice. Coaches can teach with assurance because of this industry leading design.

**V-LOOP VINYL STRAP:** Designed to evenly distribute the force from the athlete's landing, V-Loop straps eliminate tears compared to traditionally designed pits that put undue stress on the seams.

**REVERSIBLE:** Extend the life of your pit, Gill's top pads are designed to use either side safely and easily.

### Vinyl Base Units

**ALL-VINYL BASE:** Exclusive to Gill landing systems, this unique design keeps water out of your pit better than traditional mesh top units. To extend the life of your pit you keep water out of the foam. Gill's all-vinyl design gets results.

**COMPLETE INTERCHANGEABILITY:** Reversible sections for maximum interchangeability. This adds years to the life of your pit by maximizing the usage and size of the athlete's landing area.

**QUADRUPLE DURALIFE LAYER FOAM:** Athletes need to know they are landing safely and comfortably. Gill's new QUADRUPLE Duralife foam is 25% softer than others yet with firmness necessary for the safest landings.

**DUAL COATED VINYL:** Evenly distributed 1000 x 1000 denier polyester fabric is bonded on both sides with 18oz knife-coated PVC vinyl. This exclusive fabric design eliminates vinyl delamination seen in other pits after years of use. This creates the most durable casing that is lighter than the other pits.

**STITCHING:** Gill's entire landing system is stitched with the industry's strongest 210 bonded polyester thread. Simply put, your new Gill pit comes triple stitched with the toughest thread in the industry to hold up to high volume practices.

**GRIP STRIP FASTENING SYSTEM:** A pit is safest when constructed as an integrated system. Gill's Grip Strip Fastening System will keep your base sections functioning as one unit season after season.

**ECO-SMART COMPRESS PACKS:** Gill Athletics cares about the environment and your budget. All landing systems are expertly packed and shipped utilizing Compress-Pack shipping, reducing freight volume lowering fuel consumption and shipping costs. Pits restore to original size and shape minutes after unpacking.

**12 YEAR WARRANTY:** A long-term warranty is only as dependable as the company standing behind it. And after 100 years, you can count on Gill to stand behind your landing system for years to come. If any failure occurs in the first 12 years, under normal use and care, we will repair or replace the damaged part. Essentials line includes 5 year warranty.

**CUSTOM COLOR AND GRAPHICS:** Choose from over 100 unique vinyl casing and top pad color combinations offered at NO EXTRA CHARGE! Select your vinyl casing (xx) and top pad (yy) color combination. Add distinction with multi-color graphics on the top pad, weather cover, or both.

## HALO ELECTRONIC STARTER DEVICE

Introducing the next generation of starting devices—the patent pending Gill Athletics® HALO Electronic Starter Device! Unlike traditional starting pistols that require costly blanks, the HALO® is an electronic system that can connect wirelessly to the Wireless Speaker System and produce both the traditional bang sound as well as an audible tone. Connect to the Multiple Speaker System to disperse sound above the decibel standard equally across the starting line. *Compatible with FinishLynx and Eagle Eye*

E49710 \$332

## WIRELESS SPEAKER SYSTEM

The Wireless Starter System is the perfect companion to the HALO® Starting Device. Multiple Speaker System disperses sound above the decibel standard equally across the starting line.

- Includes wide-base tripod protective carrying case, rain cover, 12V battery & charging cable

## OTE 90

Handcrafted in the USA, the OTE 90 Competition is the same javelin Jan Železný threw to achieve his 98.48m world record back in 1996 – a record that still stands today. Invented and perfected by Dick Held, the OTE 90 now sports a nostalgic look in honor of that legendary throw.

## CHOOSE YOUR JAVELIN

Use this chart for help on how to choose the best javelin.

ABILITY	BEGINNER → ADVANCED
DISTANCE	< 30M → > 80M
FLEX	12.6 (SOFT) → 4.4 (STIFF)
RATING	HIGH FLEX LOW DIST. → LOW FLEX HIGH DIST.

### STEP 1:

#### SELECT JAVELIN WEIGHT

600g women's, 800g men's, or rubber tipped javelin.

### STEP 2:

#### CONSIDER ATHLETE ABILITY

BEGINNER: Consider a "softer" more forgiving rated javelin like Tru-Flight.

EXPERIENCED: Consider a "medium" stiffness that suits throwing style.

ADVANCED: Consider a "stiffer" less forgiving javelin that maximizes distance.

**HEADWIND (H)** A headwind version of an OTE javelin describes a streamlined tip designed to help cut through the wind. This javelin tip, because of its small surface area, will have self-correcting characteristics when a thrower misses the point, adding valuable distance to a missed throw. The headwind version is ideal for 'power' throwers who lack perfect technique but make up for it with strength and torque.

**TAILWIND (T)** A tailwind version of an OTE javelin describes a thicker, more blunted tip that increases the surface area in front of the javelin. When a thrower hits the point with a tailwind version of an OTE javelin, it will mimic the old rules style javelins, with a beautiful floating flight and greater distances. This tailwind version is ideal for 'finesse' throwers who lack high outputs of power, yet throw at a high technical level.

## SAND PIT FORMS & COVERS

### Sand pit forms hold more than just sand, they hold value.

With four different options of Sand Catcher locations and two practical Sand Catcher Cover options, you can design the horizontal jump facility that will perfectly meet your needs.

No matter which combination you choose; with the Gill Functional-Form, you can rest assured it's the finest product (with the easiest installation) available.

**Choose from one of two Sand Catcher Cover systems:** traditional grate and mat or Gill (exclusive) Recessed Lid. When you consider the main function of a Sand Catcher system is not to catch sand but to store it, the Recessed Lid system is rapidly becoming the choice of facilities worldwide, as it is designed to receive track surfacing to match your track facility. When coupled with the 730148 Aluminum Sand Pit Cover, a complete logical design emerges for your world class jumps facility.

**Choose from one of four sand catcher locations:** no sides, two sides, two sides and back, or all four sides. Choosing Sand Catchers on the sides will cut unnecessary costs and eliminate potential trip hazards, providing more than ample storage space for overflow sand.

## VERSACOM BOXES

### CONNECTING IT ALL TOGETHER

The **VersaCom Box** provides a junction for electricity and cable hookups. This box can be put in virtually any location around performance areas of varying surfaces. The open bottom of the VersaCom Box provides adequate drainage and conduit entry, while the hand holes in the cover allow easy access.

- Divider plates in full size version, provided to help keep electrical equipment segregated
- Main box structure is made of  $\frac{1}{4}$ " thick folded aluminum
- Lid is constructed of  $\frac{1}{4}$ " aluminum plates for maximum support and durability

The **VersaCom Box - Synthetic Version** allows material to be bonded or poured onto the top of the lid to match the surrounding surface.

The **VersaCom Box - Turf Version** features a supplied aluminum top to allow artificial turf to be glued on the jobsite, and is tethered to the box. This top is reinforced with multiple aluminum plates for maximum strength and durability. Factory installed turf infill retainment brushes keep infill out of the box.

## RAISED RUNWAYS

In the past, these types of runway systems have been priced upwards to \$75k! You can now have this product at a fraction of that price. The Gill Raised Runway allows for the flexibility to design runways that will accommodate the pole vault, long jump and triple jump for all levels of competition and practice.

The basic unit is an 8' x 4' general runway section. Specialized sections incorporate a vault box or take-off board trays and blanking lids. The construction of each section is welded aluminum, with  $\frac{1}{2}$ " plywood decking. Track surfacing is not included, so you can have your preference on surfacing.

Adjunct products for the Raised Runway include the Soft Shell Sand Pit Form for the long and triple jump (sand not included), and a pole vault pit elevating system.
