3091 - VOLLEYBALL SYSTEM

PLATE MOUNT 3-1/2" OD OUTDOOR VB SYSTEM

SPECIFICATIONS

PORTER No. 3091 POWR-SAND COMPETITION VOLLEYBALL STANDARDS (PAIR)

Posts shall be provided in a high strength extruded aluminum alloy (6063T6). Lower post shall be finished in a durable clean anodized finish for outdoor use. Upper post shall be finished in an outdoor quality powder coat. Lower post shall have a welded top, and upper post shall telescope over the outside to prevent water/debris buildup inside the system.

One pair of posts shall consist of one winch post and one tie-off post. Posts shall be 3.5" OD for use in optional No. 3080 plate mount ground sleeves.

Upper telescoping upright shall be adjustable in height by means of a high strength pull pin with adjustment holes every 1-1/2".

Winch post shall be provided with a heavy-duty type net tensioning reel with a removable type handle. Upper end of the upright shall be equipped with a pulley to reduce cable drag and undue tension on the entire system. Both posts shall come equipped with a welded handle for ease of adjustment.
