90343001 - CUSTOM WALL PAD INSERT KIT

FOR CUSTOM WALL PAD CUTOUTS

SPECIFICATIONS

PORTER No. 90343001 FIRE-RETARDANT CUSTOM WALL PAD INSERTS
PATENT PENDING

Custom inserts provide a neat, clean appearance when making cutouts in wall padding installations. Inserts are easily installed through field cutouts in panels, and secured with staples on the backside of panels. Side rails are cut in field to match the corresponding field cutout, and are finished with molded corner pieces.

Inserts and rails to be made of flexible (92 durometer), flame-retardant rubber compound which meets a vertical burning test to conform to a V-0 classification, ASTM D-3801 Vertical Burning Test. (Also meets UL-94, IEC 707)

Wall pads with unfinished field cutouts, or vinyl covered field cutouts shall not be approved as equal.
