## SPECIFICATIONS

### PORTER No. 00269-000 PORTABLE ELECTRIC WINCH OPERATOR

Compact, heavy-duty unit to operate No. 00700-000 Wall Mounted Manual Winch or any winch with a 3/4" square drive shaft.

Motor (115 volt, 8 amp) is failure-protected to withstand high overload temperatures. Glass-filled nylon motor and gear housing is virtually indestructible, providing a cool surface no matter how many backstops are raised or lowered. Precision, 3 stage gearing in a ball and needle bearing construction for smooth operation and long life.

D-Type handle is equipped with built-in trigger and reversing switch, which cannot be reversed while the unit is in operation. Auxiliary handle is provided for increased torque control. Handle can be moved for either right- or left-handed operators.

Under no-load condition, RPM of motor is 330.

Power and torque of unit is sufficient to handle all types of folding backstops up to 28'-0" attachment height.

Unit is double insulated complete with a 50 foot long power cord with two-prong plug (no grounding required).
