RETRACTOR SYSTEMS FOR No. 917 LINE

SPECIFICATIONS

PORTER No. 10799-100 HOIST CABLE RETRACTOR SYSTEM
(For Use Only On No. 917 Forward-Fold, Center-Strut® Backstops)
(For Attachment Heights Up To 25')

Retractor system shall automatically retract the hoist cable away from the trajectory of a basketball when the backstop is in the down (playing) position.

The hoist cable is retracted by means of a 1/8" diameter galvanized aircraft cable, which is routed with a special pulley system to a concealed weight located inside the 6-5/8" O.D. mast tube of the No. 917 backstop. The weight/pulley system automatically retracts the hoist cable as the backstop is lowered into position.

On installations exceeding 25' attachment heights, specify No. 10799-110.

Systems incorporating the use of springs, spring-loaded reels, or bungee cords, will not be approved as equal.

PORTER No. 10799-110 HOIST CABLE RETRACTOR SYSTEM
(For Use Only On No. 917 Forward-Fold, Center-Strut® Backstops)
(For Attachment Heights Above 25')

Same specification as No. 10799-100 with the exception that additional concealed weight is provided.

PORTER No. 10799-200 HOIST CABLE / SAF-STRAP RETRACTOR SYSTEM
(For Use Only On No. 917 Forward-Fold, Center-Strut® Backstops)
(For Attachment Heights Up To 25')

Same specification as No. 10799-100 with the exception that system shall automatically retract both the hoist cable and Saf-Strap (optional No. 10797-100).

On installations exceeding 25' attachment heights, specify No. 10799-210.

PORTER No. 10799-210 HOIST CABLE / SAF-STRAP RETRACTOR SYSTEM
(For Use Only On No. 917 Forward-Fold, Center-Strut® Backstops)
(For Attachment Heights Above 25')

Same specification as No. 10799-200 with the exception that additional concealed weight is provided.
