## Ground Sleeve Measurement

Finding the correct size is the first step in selecting proper equipment. Volleyball poles are typically two sizes: 3" and 3.5" in diameter. The images below provides an easy way to determine your pole size.

### HOW TO MEASURE:

Use a ruler or tape measure to verify the inside opening. Or simply cut out the shapes along the dotted lines and place inside the ground sleeve. The correct size should have a nice fit inside the sleeve. In addition, the 3.5" cutout will not fit inside a 3" opening.

*\*Actual sizes shown for clarity.*

### RULER CUTOUT
